

RENEWABLE ENERGY

REDUCING OUR IMPACT ON THE PLANET

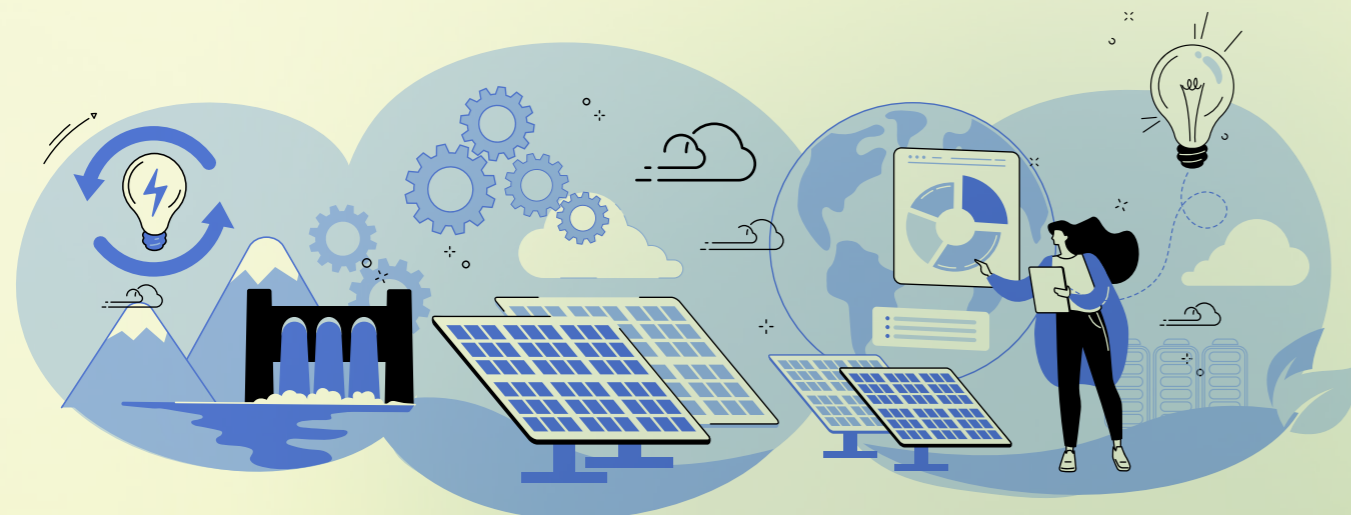

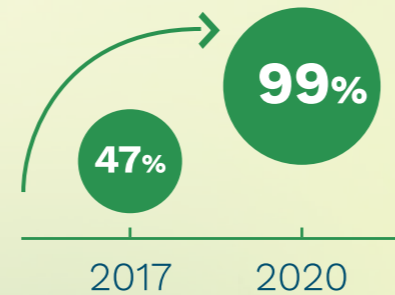

PROTECT NATURAL RESOURCES

USE OF RENEWABLE ENERGY

Since 2017 we have constantly **increased our usage of energy from renewable sources** from 47% in 2017 to 99% in 2020.

Our next objective is to do the same also in our Poggio a Caiano plant.

WE ARE COMMITTED TO REDUCING OUR ENERGY CONSUMPTION THROUGH SPECIFIC ACTIONS:

- Switch to LED lamps in all plants.
- Installation of photovoltaic panels also in our Mendrisio plant.
- Continuous monitoring systems.
- Energy audits in all plants.
- Shift from diesel heating to natural gas system.

THESE CHOICES HAVE LED TO A REDUCTION OF THE GROUP CO₂ EQ. EMISSIONS OF APPROXIMATELY 5%.
