

FEATURES

The use of finishes without galvanic treatments offers many advantages, including:

- Lower emissions in the atmosphere
- Lower water consumption
- No use of harmful substances
- Lower production of hazardous waste

Wherever possible, Oerlikon Riri is committed to producing finishes that do not involve the use of galvanic treatments and that result in lower consumption of resources and water, no use of chemicals and a reduction in CO₂ emissions as well as in waste production.

Between these low-impact finishes, you can find:

- Raw finishes
- Polished finishes
- Sandblasted finishes
- Oxidized finishes
- Physical Vapour Deposition (PVD)
